Join Melanie Bunn, MS, RN, Dementia Training Specialist with Dementia Alliance of North Carolina, who will answer your questions and share how to help people living with dementia and their caregivers. Take a deeper look at the illnesses that cause dementia, such as Alzheimer's disease. Explore better ways to help those living with dementia. And discuss tips and tricks to make caregiving easier. This interactive workshop will also give you the opportunity to interact with others, practice skills, and share, too.
